

Technical Update

Product Description:	e7 Multifunction display all variants.
Product Code(s):	E62354 – E62355- T70001 – T70002 – T70006 –T70007
Effective Start Date:	N/A
Subject:	Advisory - Compatibility with other Multifunction Displays

Connecting the new e7 to other Multifunction Displays (E-wide and G-series). Overview

Raymarine is committed to a policy of continued product improvement, and support for existing customers is part of this policy. While Raymarine tests numerous network configurations, there may be configurations that we have not tested. We therefore recommend a level of caution when networking the e7/e7D with other Multifunction displays .

Therefore with specific reference to installation instructions and the interim sheet:

- On Page 21 & 24 of the installation instruction it states that the e7 / e7D multifunction displays can be networked with E90W, E120W, E140W, and G-Series units. Despite our extensive testing, there may be network configurations that will result in diminished system performance. Due to this fact, Raymarine does not recommend networking the e7/e7D with these Multifunction displays.

The e7 /e7D does work with the other products listed within the installation instruction.

For networked systems featuring e7 / e7D units, ONLY e7 / e7D units are currently supported in a network configuration. The connection of up to 5 additional e7 / e7D units is fully supported. The current levels of e7 / e7D compatibility with the existing E wide and G series equipment may change in the future. Please check the Raymarine website regularly for software updates for your Raymarine products.

WARRANTY ALLOWANCE:

 YES

MAXIMUM WARRANTY LABOUR TIME:

maximum labour allowance to complete modification / repair...

minutes

 NO

Please follow the Raymarine warranty claim process for additional labour, travel and mileage

DISTRIBUTION LIST:

- RAYMARINE & SUBSIDIARY
- DISTRIBUTOR & SERVICE DEALER
- INSTALLING DEALER
- BOATBUILDER / OEM
- KEY STOCKIST / RETAILER

- Add to Raymarine website – Dealer Area
- Generate FAQ – Raymarine website – Public Area

INFIELD ACTIONS:

- ACTION AT NEXT ROUTINE SERVICE
- HOLD STOCK
- REWORK STOCK
- RECALL STOCK
- RECALL CUSTOMER PRODUCT
